Graduated Measure

Stainless steel bins and containers are mainly required in the food sector but also in the chemical and pharmaceutical industry.

WALDNER offers a various range of products for this purpose.

Universal containers with accessories like lids, clamping locks, drain cocks and wheels from 20 to 150 litres.

Conical and cylindrical buckets, with and without bottom ring in different sizes.

Graduated measure up to 5 litres and graduated buckets with outlet spout up to 20 litres.

A matching stainless steel lid is available for all stainless steel buckets.

On request all containers and bins can be equipped with your company's logo (etching by means of Pico process).

Transport containers and accessories

Food/Drinks carrier

For transport purposes WALDNER offers transport containers from 6.5 to 15.5 litres. The matching lid is equipped with a seal and three clamping locks. A valve in the lid serves for venting.

Furthermore stainless steel transport cans with lid (also with outlet spout) from 1 to 50 litres are available.

Funnel

Transport can with lid and chain

All transport containers and cans are made of material 1.4301 (V2A). Individual designs can also be offered in material 1.4436.

The following is a small extract of our range of stainless steel accessories:

Funnels from 0.02 to 15 litres, scoops, ladles up to 5 litres (without fig.), waste bins and closed waste containers with wheels, water quench casserole (without fig.), stainless steel sieves with different mesh sizes.
